

DURAGRIT

VITRIFIED

The exclusive collection brings avant-garde sanitary ware to the fore for an ambiance distinguished by a distinct flair of creativity and efficiency. The elements of the collection are inspired by subtlety and staggering profundity that prioritizes functionality. The minimal nature of the collection is capable of leaving a lasting impression on your own bath spaces.

Note: Colours printed above may differ from original colours of ceramics. For true selection; refer to actual samples or shade board.

Continuous innovation and improvement in manufacturing techniques and products are carried out regularly. We reserve the right to supply articles which may not correspond exactly with the particulars given in this booklet.

Technical Details - Dimensions:

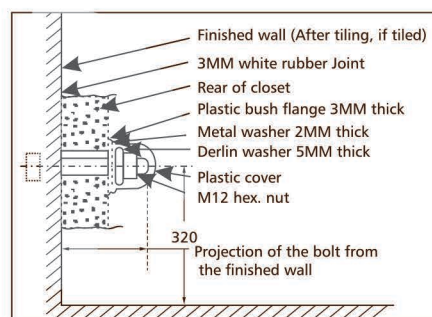

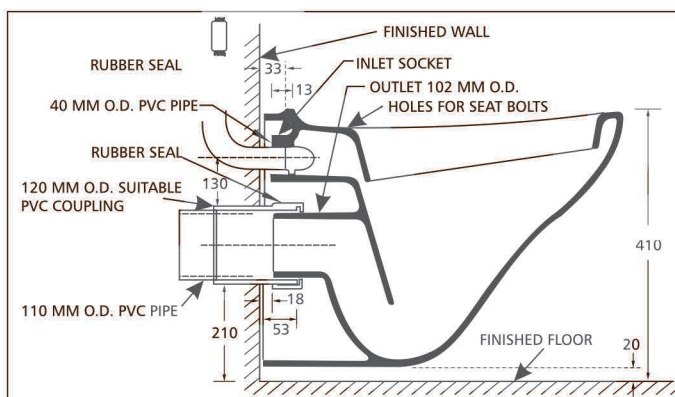

When ordering product from this brochure, please advice your plumber of the correct sizing to ensure the accurate installation.

We Can Change any Product or accessories without prior of notice.
(include Size/Dimensions/Shape/Seat Cover)

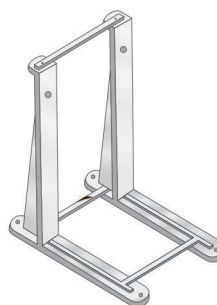

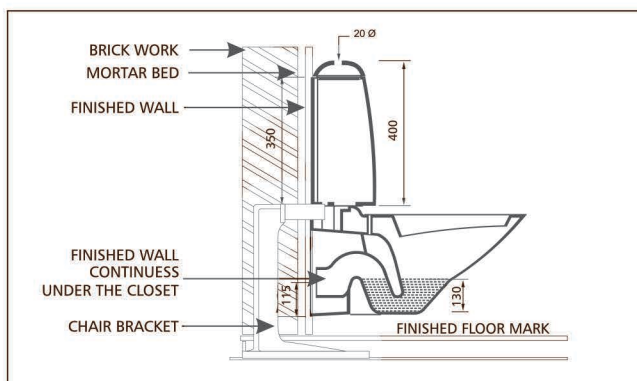

INSTALLATION & INSTRUCTIONS

CONCEALED WALLHUNG

1. If the wall is going to be plastered for a thickness of 12 mm and a tile thickness of 6-7 mm, the projection of the bolts from the finished wall should be 66 mm only.
2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolts that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface of the finished floor is 320mm.

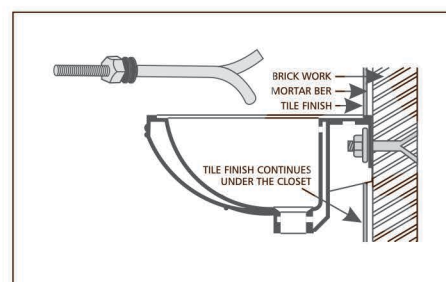

WALL MOUNTED COUPLE CLOSET (Premium & Italia)

WALL HUNG BASIN

1) The rag bolt should be first grouted into the wall using cement / concrete, (as shown) as per distance between slots provided in the wash basin. The bolts should be fixed perpendicular to the wall. Allow cement / concrete to set. Check if the Rag bolts are firmly fixed. Fix the Wash Basin in the bolt using Nut & Washer. (2) If brackets are use prefer nylon or aluminum instead of iron brackets as it tends to rust. (3) If small basins are screwed to wall, use nylon washers and steel screws. (4) While fixing waste outlet, ensure that the rubber washer is placed on the outlet under the basin.

TIPS FOR MAINTENANCE

- The sanitarywares from Soncera have a smooth, impermeable and practically scratch-resistant surface, which is resistant to most of the acids and alkalis commonly encountered in the home.
- For daily care, you will usually only need water and a damp cloth. Tidemarks, grease and soap residues can be removed quickly and easily with a vinegar-based or bathroom cleaner.
- Like any other part of your house, the bathroom can be made to look great and made to last if it is taken care of regularly. Here are some simple tips that can help you keep your bathroom glittering and fresh everyday.

Wash Basins

The wash basin needs to be washed with a mild detergent at least once a day. After washing, the basin must be wiped with a dry cloth to avoid water stains, especially on dark colours. Wash basins not cleaned for long time can accumulate stains. To remove the stains, diluted hydrochloric acid may be used.

Closets

Use a plastic bristled brush with a plastic handle to scrub the toilet with a cleanser, at least once a day. After flushing the toilet, give it a "once over" with the brush to avoid minute discoloring.

In the case of closets, if there has been no maintenance over a long period of time, water deposits and discoloration are formed on the surface of areas that get wet. In such cases, these stains / marks can be removed with the help of a solution of diluted hydrochloric acid. Do not use powder paste, thinner or dry cleaning liquids. To remove fine scratches, use Brasso or car rubbing compound and then polish with a polish cloth.

Internal Fittings of Cisterns

Accumulation of dust / small piece stones/sand coming through pipeline in the water on inlet and outlet rubber diaphragms may result in leakage of water. In case of such malfunctioning, all you have to do is open the inlet/outlet valve and clean the diaphragms or replace them. Use only genuine spare parts.
